

TechNova Solutions

Junior Full Stack Developer Intern

Location: Bengaluru, India (Hybrid) | Duration: 6 Months | Stipend: Competitive | Type: Full-Time Internship

About TechNova Solutions

TechNova Solutions is a fast-growing product company building SaaS tools for small and medium businesses. Our engineering team ships fast, values clean code, and works closely across the stack. We're looking for a Junior Full Stack Developer Intern to join our core product team and contribute to real, customer-facing features from day one.

Role Overview

As a Full Stack Developer Intern, you will work with our engineering team to design, build, and maintain features across the frontend and backend of our web application. You'll get hands-on experience with modern JavaScript frameworks, RESTful API design, and database management, while collaborating in an agile team environment.

Key Responsibilities

- Develop and maintain responsive web interfaces using React.js and modern CSS frameworks.
- Build and consume RESTful APIs using Node.js and Express.js.
- Design and query relational and NoSQL databases (MongoDB / PostgreSQL).
- Write clean, maintainable, and well-documented code following team coding standards.
- Collaborate with designers and senior engineers to translate requirements into working features.
- Participate in code reviews, sprint planning, and daily stand-ups.
- Debug and fix issues across the stack, and write basic unit tests for new features.

Required Skills & Qualifications

- Currently pursuing or recently completed a degree in Computer Science, IT, or a related field.
- Solid understanding of JavaScript (ES6+), HTML5, and CSS3.
- Hands-on experience with React.js for building user interfaces.
- Working knowledge of Node.js and Express.js for backend development.
- Familiarity with MongoDB or another NoSQL database.
- Understanding of RESTful API design principles.
- Basic knowledge of Git and version control workflows.
- Strong problem-solving skills and eagerness to learn new technologies.

Good to Have (Bonus Skills)

- Experience with TypeScript.
- Exposure to cloud platforms such as AWS or Azure.
- Familiarity with Docker and containerization basics.

- Knowledge of CI/CD pipelines.
- Prior internship, freelance, or personal project experience with full stack development.
- Contributions to open-source projects.

What We Offer

- Mentorship from experienced full stack engineers.
- Opportunity to work on live production features used by real customers.
- Flexible hybrid work environment.
- Certificate of internship and potential pre-placement offer (PPO) based on performance.

To apply, submit your resume along with links to any relevant projects or GitHub profile.
